Dynamics of Atmospheres and Oceans, 16 (1992) 529–530
Elsevier Science Publishers B.V., Amsterdam

Contents

Volume 16, 1991–1992

Special Issue: The Atmospheric Energy and Water Cycle
Guest Editors: K. Arpe and Y. Fouquart

Preface ix

Research Papers

The meridional heat flux in the atmosphere as derived from the ECMWF analyses for the years 1981–1986, and the oceanic heat transport inferred using the residual method
R. Michaud and J. Derome (Montreal, Que., Canada) 1

Analyses of the global distribution of precipitation
P. Arkin and J. Janowiak (Silver Spring, MD, USA) 5

Operational global analysis of monthly precipitation totals planned by the Global Precipitation Climatology Centre
B. Rudolf, H. Hauschild, M. Reiss and U. Schneider (Offenbach, Germany) 17

The hydrological cycle in the ECMWF short range forecasts
K. Arpe (Reading, UK) 33

Retrieval of surface radiation fluxes from satellite data
J. Schmetz (Darmstadt, Germany) 61

Use of Meteosat data for validation of the diurnal variation of the outgoing longwave radiation produced by ERBE
F. Cheruy and R.S. Kandel (Palaiseau, France) 73

Simulation of cloud radiative forcing with the ECMWF model
M. Vesperini, Y. Fouquart (Villeneuve d'Ascq, France) and J.-J. Morcrette (Reading, UK) .. 85

Fluxes of latent heat over the oceans: climatological studies and application of satellite observations
E. Ruprecht and C. Simmer (Kiel, Germany) 111

On the use of satellite derived heating rates for data assimilation within the tropics
W.A. Heckley, G. Kelly and M. Tiedtke (Reading, UK) 123

GCM response of the mean zonal surface heat and water budgets to a global sea surface temperature anomaly
M. Déqué and J.F. Royer (Toulouse, France) 133

Comparison of radiance fields observed by satellite and simulated by the LMD general circulation model
W. Yu, G. Sèze, H. Le Treut and M. Desbois (Palaiseau, France) 147

Research Papers

Transition to geostrophic turbulence in a thermally driven sea
S.A. Condie (Norfolk, VA, USA) 167

Quasigeostrophic, ellipsoidal vortices in a stratified fluid
S.P. Meacham (Cambridge, MA, USA) 189

On the response of the ocean upper layer to synoptic variability of the atmosphere
A.B. Polonsky, S.A. Baev (Sevastopol, USSR) and A. Diakite (Conakry, Guinea) 225

Instability of internal waves near a critical level
K.B. Winters and J.J. Riley (Seattle, WA, USA) 249
Film slicks on the sea surface and some mechanisms of their formation
S.A. Ermakov, S.G. Salashin and A.R. Panchenko (Nizhny Novgorod, USSR) 279
The exchange of fluid mass between quasi-geostrophic and ageostrophic motions during the reflection of Rossby waves from a coast. I. The case of an infinite rectilinear coast
V.L. Dorofeyev (Sevastopol, USSR) and V.D. Larichev (Moscow, USSR) 305

Book Reviews 331

Guide for Authors 335

Research Papers
Nonlinear interaction of a zonal jet and barotropic Rossby-wave turbulence: the problem of turbulent friction
E.S. Benilov, V.G. Gnevyshev and V.I. Shrira (Moscow, USSR) 339
Continental shelf response to forcing by deep-sea internal waves
R.H.J. Grimshaw (Kensington, N.S.W., Australia) and D.C. Chapman (Woods Hole, MA, USA) 355
Computing the steady oceanic circulation using an optimization approach
E. Tziperman (Rehovot, Israel) W.C. Thacker (Miami, FL, USA) and K. Bryan (Princeton, NJ, USA) 379
Order and chaos in ocean current dynamics: numerical experiments
D.G. Seidov and A.D. Marushkevich (Moscow, USSR) 405

Book Review
Atmospheric Particles and Nuclei by G. Götz, E. Mészaros and G. Vali — P. Buat-Mënard .. 435

Research Papers
Isolated potential vorticity patches in quasi-geostrophic zonal shear flows
J.-I. Yano and G.R. Flierl (Germany, USA) 439
Steadily translating anticyclones on the beta plane
J. Nycander and G.G. Sutyrin (Sweden, Russia) 473
A comparison of differential systems and numerical methods for the computation of smooth oceanographic flows
G.L. Browning, W.R. Holland and H.-O. Kreiss (USA) 499

Book Review
Historic Storms of the North Sea, British Isles and Northwest Europe
K. Weston (UK) 527

Contents of Volume 16 529
